

Pushpay/ParishStaq Update

All sites and all waves are now active in the implementation process.

This week marks an important milestone for Parishioner Engagement System: All eleven waves are now involved in some phase of active implementation!

Waves 8-11 were invited to begin their implementation journey and received an email inviting their representatives to attend their pre-wave informational meeting. If you did not receive this email, please email [Jennifer Wong](mailto:Jennifer.Wong).

Waves 6 and 7 received an email invitation to their pre-wave orientation meeting, giving them specific tasks to prepare for their wave launch this coming April.

Waves 4 and 5 submitted their data which has been prepped by our internal data team for migration into the system. These waves should be actively accessing their data within ParishStaq towards mid-to-late February, possibly earlier.

Waves 2 and 3 continue to work within the new system and are preparing for their giving launch. As early adopters, we are so grateful for their detailed vetting of their data and processes within the system. This wave and the pilot wave are helping to form best practices.

Our pilots celebrated their successes and shared any challenges at a recent check-in meeting. Both Holy Family (Kirkland) and the Sacred Heart (Battle Ground)/St. Joseph the Worker (Yacolt) are so close to completing their project plans. We are very grateful for all the work they have done.

**PARTNERS
IN THE GOSPEL**

How will Partners in the Gospel impact the ParishStaq implementation?

Partners in the Gospel will take 3 years, through 2027, for parish families to be formed. By being fully implemented with most ministries active within ParishStaq, parishes can use the engagement tools in the software to continue to organize and engage parishioners, helping them to stay connected through significant change, and be a channel for ministry and mission information.

For all Waves
Monthly Check-In
Join us at the next
Zoom Monthly Meeting
February 8 at noon

These are not recorded, but the slide deck and FAQ are found at the bottom of the Training page of the [Learning & Implementation Site](#).

Our new format includes breakout rooms:

Main Room: PDS Data Cleaning and Pre-Wave

Breakout Room: Implementation & ParishStaq
