

ParishStaq™ for Parish Ministry

Sacrament Tracking in ParishStaq

In October 2022, Pushpay announced in the new sacraments dashboard within ParishStaq Church Management System (ChMS). Users can manage the sacramental preparation and faith formation information as they view engagement insights about a parishioner's involvement in the parish.

In this article ([link](#)), Chris Peterson of St. Michael Parish, Olympia shared: "It's been incredible to see how far the ParishStaq product has come in the last year. The sacrament tracking dashboard is another piece of the technology puzzle that enables us to streamline processes so we can better minister to our parishioners." St. Michael Parish was a ParishStaq user prior to the selection and subsequent implementation by the Archdiocese.

What do you know about your parish's implementation of ParishStaq?

Your Implementation Team's goal is to support parishes thoughtfully and appropriately throughout the implementation process.

Program Awareness Survey

When Is My Wave? ([link](#))

Recent ParishStaq product developments regarding Sacraments in ParishStaq include:

- Sacrament management
- Mobile accessibility: Using the LEAD App, Parish Leaders can access sacraments and faith formation information while on the go
- Export and electronic file storage: Storing electronic versions of sacrament certificates; parishes will have the ability to export and natively print sacrament register details with a click of a button, eliminating the need to find and create duplicate documentation.
