

ParishStaq™ for Parish Ministry

Do You Hear What I Hear?

ParishStaq is a suite of online tools that is more than a database. It includes a desktop interface and two apps. One feature of the ParishStaq is interactive group management and messaging. This allows pastoral leadership and staff to facilitate deeper engagement in parish life.

What do you know about your parish's implementation of ParishStaq?

Your Implementation Team's goal is to support parishes thoughtfully and appropriately through the implementation process.

To help us accomplish this, we ask that you complete a brief survey. Your results will be anonymous. We are only collecting general demographic information to understand best where to direct our communication and training.

The survey can be found at this [link](#) or by scanning the QR code.
